1 Installation

Two ways to do it:

1.1 By connecting to Prestashop Addons

- Go to the ”Module Manager” page from the menu of your back office,
- Click on the ”Connect to Addons Marketplace” button at the top right of the page,
- Enter your Prestashop Addons credentials,
- All your purchases will appear on this page, you just need to install the desired module by clicking on ”Install” in front of the module to install it.

1.2 By downloading the .zip file

- Go to the ”Downloads” page of your Prestashop Addons account (`https://addons.prestashop.com/en/agency-products.php`),
- Download the module with the compatible version to your Prestashop,
- Go to the ”Module Manager” page from the menu of your back-office,
- Click on the ”Install a module” button at the top right of the page,
- Drag and drop the downloaded module.

2 Settings

2.1 Set global values

The module configuration, available by clicking on “Configure” in front of the module on the “Module Manager” page, allows you to activate or not the display of deliveries to different locations.

2.2 Displays

What is added by the module is framed in red:

2.2.1 Invoice

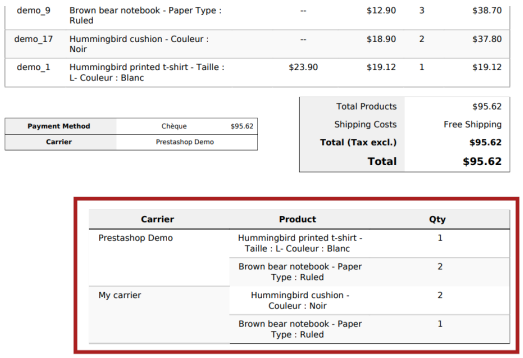

Figure 1: Invoice example

2.2.2 Order details of the customer

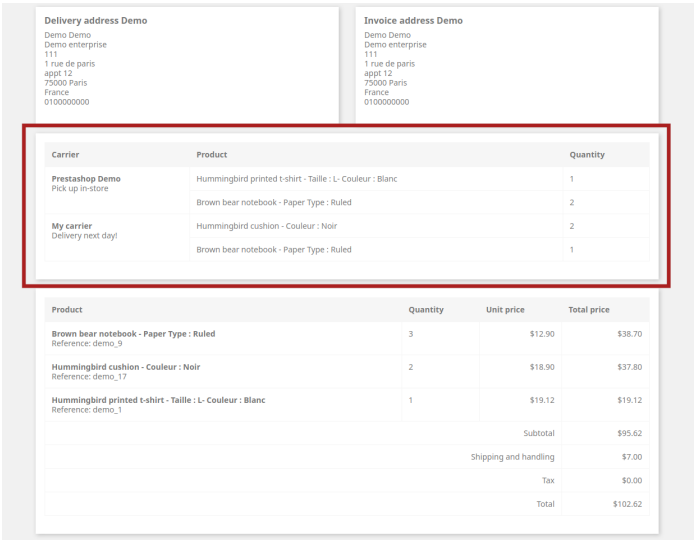

Figure 2: Order details example

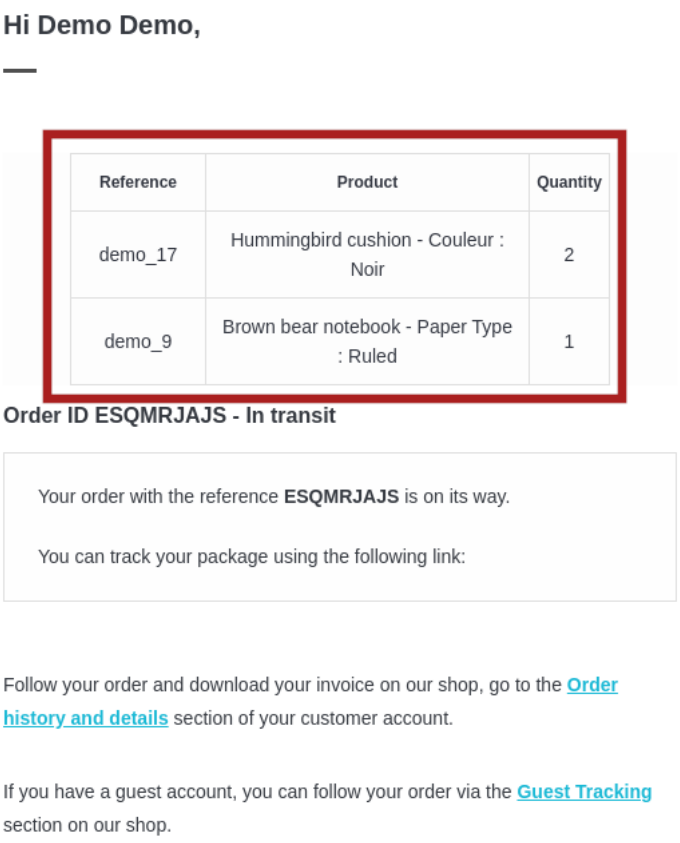
2.2.3 Email



Hi Demo Demo,

Reference	Product	Quantity
demo_17	Hummingbird cushion - Couleur : Noir	2
demo_9	Brown bear notebook - Paper Type : Ruled	1

Order ID ESQMRJAJS - In transit

Your order with the reference **ESQMRJAJS** is on its way.

You can track your package using the following link:

Follow your order and download your invoice on our shop, go to the Order history and details section of your customer account.

If you have a guest account, you can follow your order via the Guest Tracking section on our shop.

Figure 3: email example

2.3 Recalculate shipping costs after editing the order

2.3.1 Prestashop version $<$ 1.7.0

To recalculate the shipping costs after modification of the order, in the module configuration, enable or disable the parameter “Recalculate the shipping costs after modification of the order”.

2.3.2 Prestashop version > 1.7.0

To recalculate the shipping costs after modifying the order, go to the "Shop parameters → Order Settings" menu. From this menu, find the parameter "Recalculate shipping costs after editing the order" and enable or disable it according to your need.

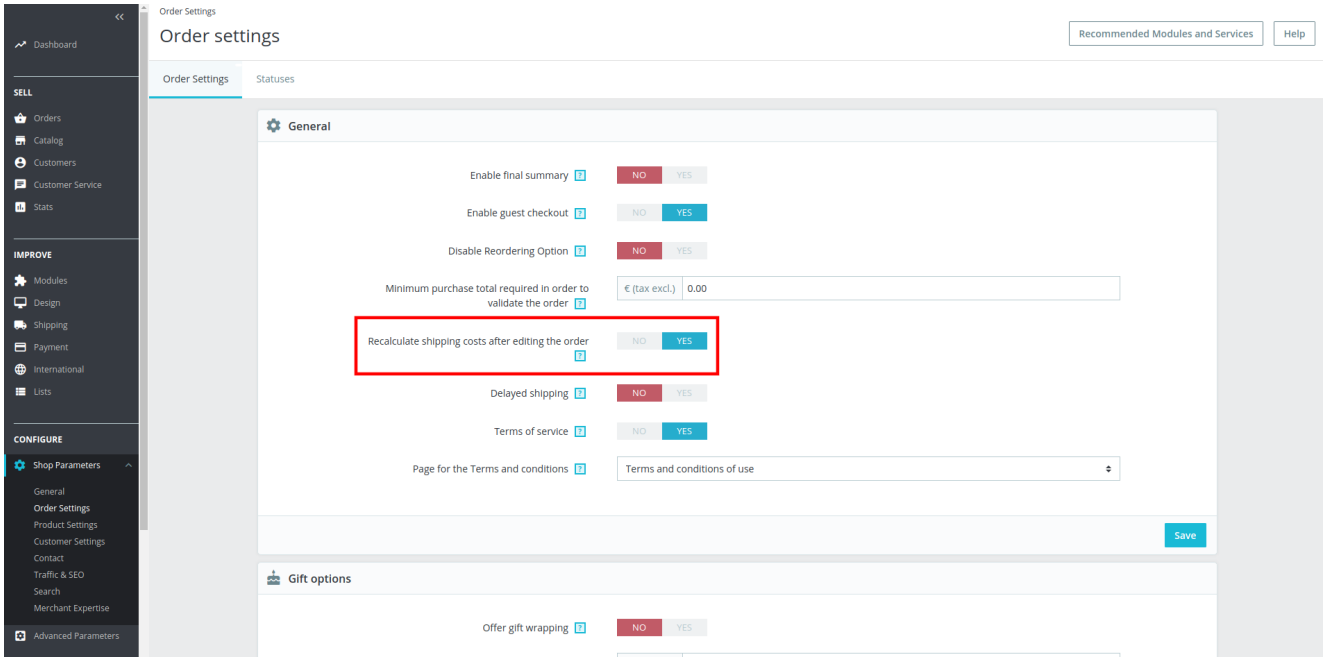


Figure 4: Recalculate shipping costs after editing the order

3 Add / edit a shipping

3.1 Elements on the screen

From the order details display page, go to the "Shipping" section. You should have a display equivalent to this:

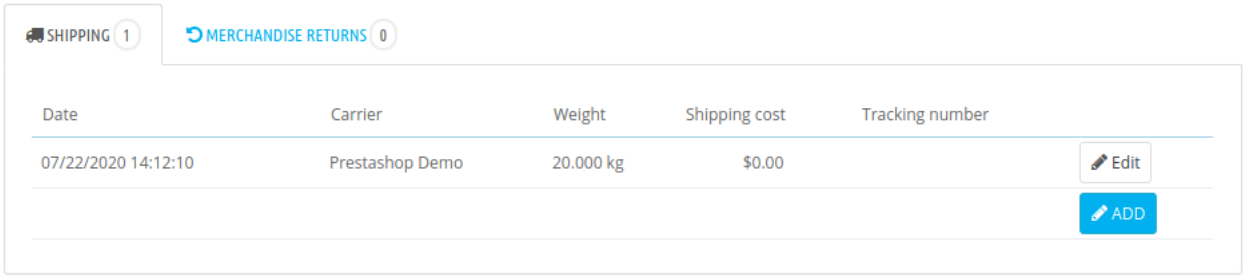

Figure 5: Order's details

Then click on the “Edit” button to modify the delivery or on the “Add” button to add a new delivery. You must have a display equivalent to this (regardless if this is an addition or a modification):

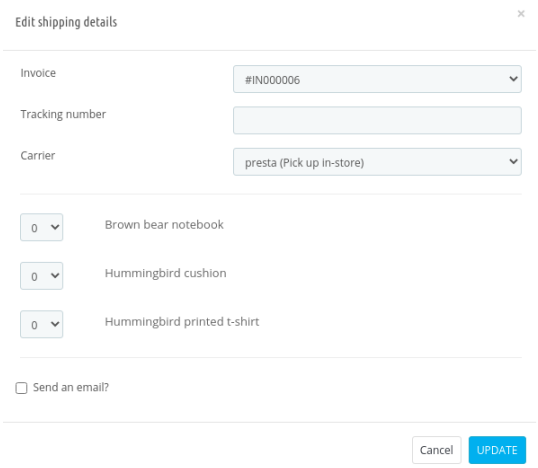

Figure 6: Add / edit page of a delivery

This page is divided into three parts.

3.1.1 1st part

The first part is the registration of the tracking number with the carrier and the invoice associated with it. Note that the delivery cost will only be changed if a parameter is changed in the order parameters (see the part 2.3 for the steps). The message in the blue bubble at the top of this screen is displayed if the parameter is not activated.

3.1.2 2nd part

On the second part, you can see all the products that are shipped by this delivery. The products displayed are all the products of the order compatible with the selected carrier.
An error can occur if:

- no product is selected for a carrier,
- a quantity of a product is selected from two different carriers

3.1.3 3rd part

By checking the box, an email will be sent to the customer specifying the url with the tracking number which will redirect to the carrier’s site but also the list of products that will be sent.

3.2 Examples

3.2.1 Edit

We first choose to modify the first planned delivery to add the products concerned:

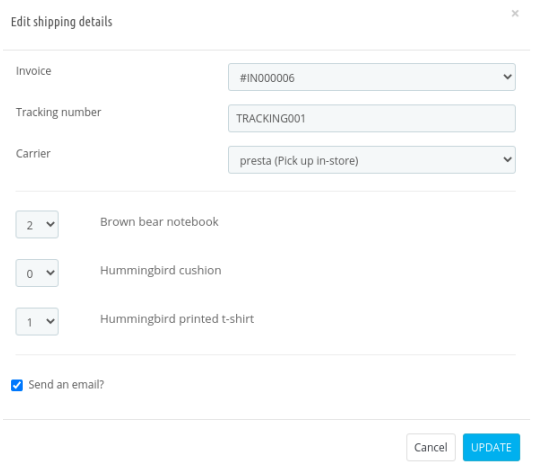

Figure 7: i.e: edit

By clicking on “Update”, it will modify the tracking number, the weight of the delivery according to the selected products as well as the price of the delivery (if the store configuration allows it see 3.1.1). We can therefore see on the start screen that the parameters have indeed been changed:

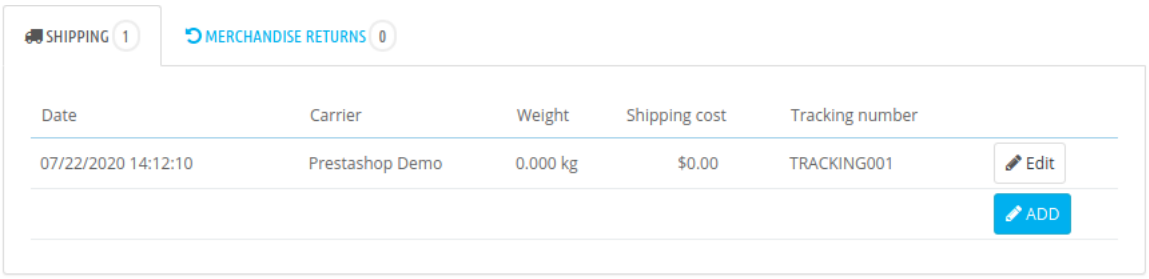

Figure 8: i.e: edit

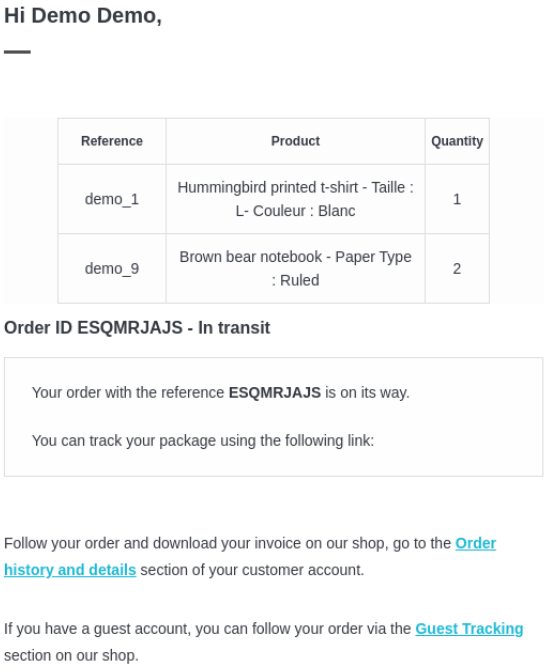
The email received by the customer (if the option is enabled in the configuration):



Hi Demo Demo,

Reference	Product	Quantity
demo_1	Hummingbird printed t-shirt - Taille : L- Couleur : Blanc	1
demo_9	Brown bear notebook - Paper Type : Ruled	2

Order ID ESQMRJAJS - In transit

Your order with the reference **ESQMRJAJS** is on its way.

You can track your package using the following link:

Follow your order and download your invoice on our shop, go to the Order history and details section of your customer account.

If you have a guest account, you can follow your order via the Guest Tracking section on our shop.

Figure 9: i.e: edit

3.2.2 Add

We now click on the "Add" button to add a new delivery:

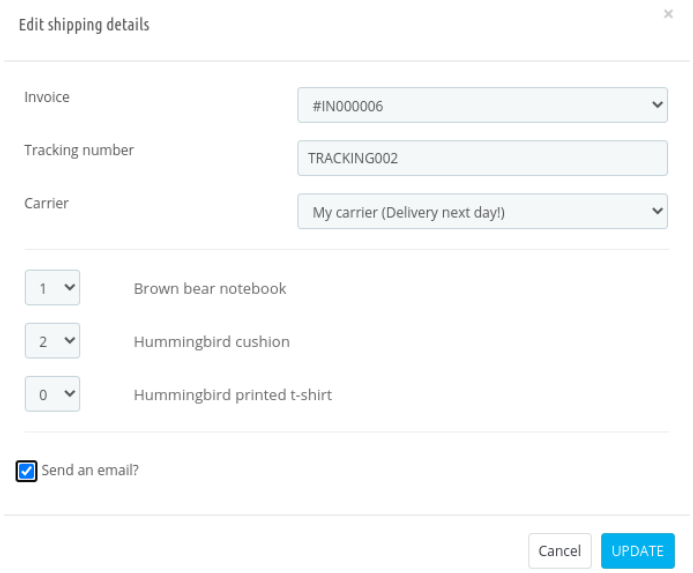


Figure 10: i.e: add

This delivery covers all other products that were not selected by the first and it is a paying delivery from 10kg (which is exceeded with these items). By validating and looking at the summary table, we can see that the price of the delivery is not at zero and that the total price of the order has increased:

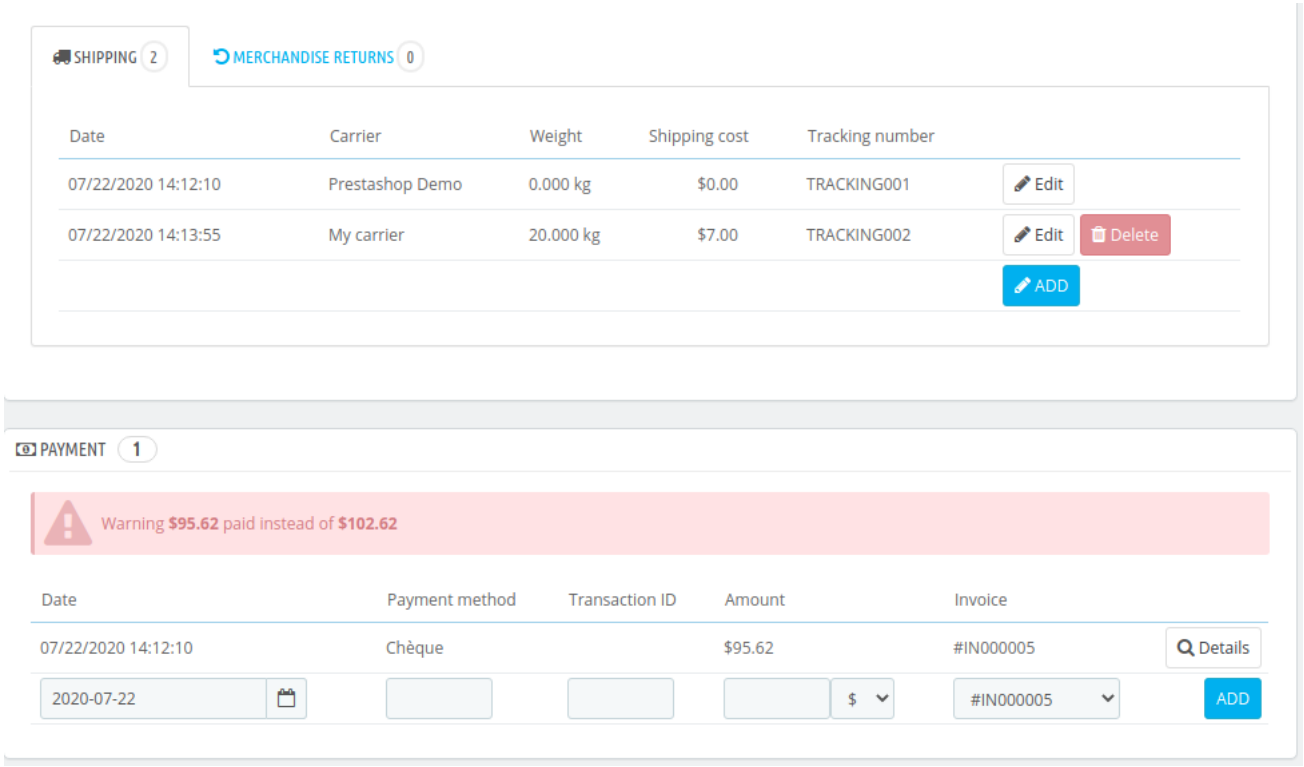

Figure 11: i.e: add

The email received by the customer (if the option is enabled in the configuration):

Hi Demo Demo,

—

Reference	Product	Quantity
demo_17	Hummingbird cushion - Couleur : Noir	2
demo_9	Brown bear notebook - Paper Type : Ruled	1

Order ID ESQMRJAJS - In transit

Your order with the reference **ESQMRJAJS** is on its way.

You can track your package using the following link:

Follow your order and download your invoice on our shop, go to the Order history and details section of your customer account.

If you have a guest account, you can follow your order via the Guest Tracking section on our shop.

Figure 12: i.e: add

3.2.3 Deletion

All you have to do is click on the Delete button in front of the desired delivery. A dialog box appears asking you if you are sure:

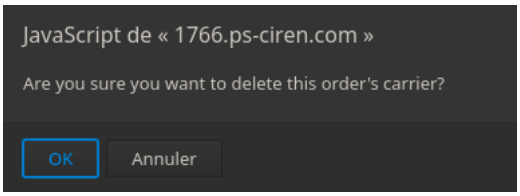

Figure 13: i.e: deletion

4 Delivery slips export

The delivery slips export can be done in two different ways. Either by going to each order and to click on the button “Delivery slip” in front of each carrier or from the menu “Orders → Delivery slips” and by activating the module with the button having the name of the module. Thanks to this button, all delivery slips generated by the module will be exported over the selected period.

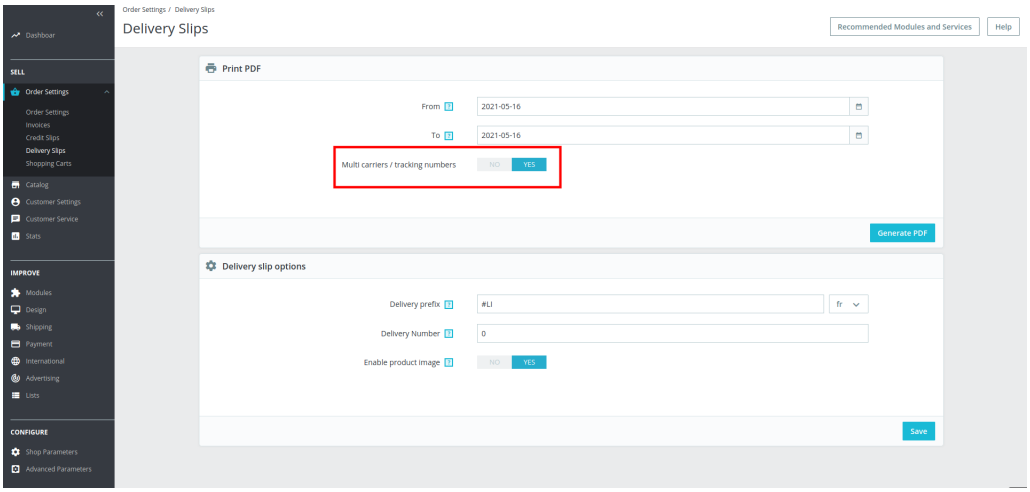

Figure 14: Delivery slips export

5 Conclusion

If you have any questions or suggestions to improve the module, do not hesitate to contact me from your Prestashop Addons account.

If you like my work, please rate the module at this link: `https://addons.prestashop.com/en/ratings.php`. In addition to helping me, it gives you a 5% discount on your next Prestashop Addons order.

Thank you,
Dennis
